... WHEN DREAMS COME TRUE

Our swimming pools made of stainless steel have the potential to make your pool dreams become a reality. And much more than that – they will by far exceed your wildest dream. The exceptional look of stainless steel is convincing due to its wonderful, timeless elegance which goes well with all types of architecture. Individual solutions can be eminently realized with this material as each person has their own idea of the perfect pool.

Stainless steel is a material that is compelling due to its longevity and its resistance to heat, frost and UV light. One excellent example of the life of this material is the stainless steel roofing on the tower of the old Chrysler Building in New York which was built almost a century ago. Extremely low-maintenance due to the long-lasting water tightness of the pool, stainless steel promises many years of bathing enjoyment without annoying renovations. As far as hygiene is concerned stainless steel provides substantial advantages because soiling and deposits have very little chance on its smooth, jointless surface.

The technical flexibility of our material allows for problem-free welded attachment of all added technology and features. That makes it easy to realize such extras as lighting, whirlpool function etc.

A photograph of a modern indoor swimming pool. In the foreground, a row of white lounge chairs is positioned on a light-colored tiled deck. To the left of the chairs is a swimming pool with a blue tiled bottom and a dark, textured metal grate at the edge. In the background, a glass-enclosed area contains several treadmills. The walls are made of dark, textured stone, and the ceiling is white with recessed lighting.

FIRST-CLASS WORKMANSHIP

The sound qualities of stainless steel are transformed by our know-how and experience into a beautiful and timeless product of lasting value. Thirty years of experience in processing this high-quality material has now been put to use by us for the last 15 years to design and realize individual pool solutions for our customers.

OVERFLOW POOL

This type of construction provides a completely level surface. That is why overflow pools are the „Crème de la Crème“ of swimming pool construction. Your pool nestles into your terrace beautifully and harmoniously.

SKIMMER POOL

Swimming at a level very nearly flush to the ground provides a special, exclusive charm. Due to many years of experience in constructing skimmer pools we were able to create a solution which leaves only 3 cm between the water level and the upper edge of the pool. Combined with our skimmers which can be detached from the direction of the water we have set a new benchmark in this sector for shapeliness as well as continuity within an existing terrace.

LEISURE AND RELAXATION BASE

It could be a dreamlike oasis for relaxing hours for two or a place for wild pool parties with friends or simply a paradise for the whole family.

However you wish to live your life we have the perfect pool for all occasions. Due to the durability of the material and our innovative processing you can concentrate on the important things in your life and simply enjoy your leisure time at the pool.

Many years of experience and projects in diverse countries from the Caribbean to Russia have formed a solid basis for the functionality and durability of our swimming pools.

INFINITY POOL

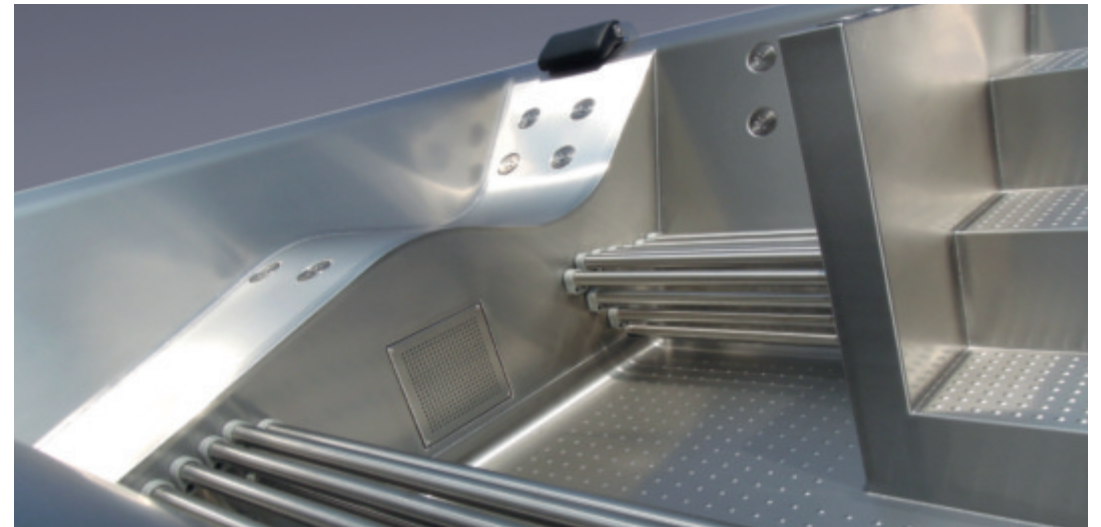

The surface of the pool and the horizon blend into one. By lowering one end of the pool one creates the impression that the water is endless. That is the origin of the name „infinity pool“. With this special type of pool one can create seemingly edgeless swimming pools.

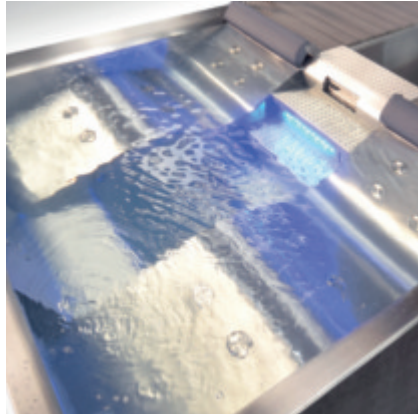

In this special segment we have also created a USP through intensive development. Our pools do not have a visible welding seam at the waterline. The result of this technique is breathtakingly aesthetic.

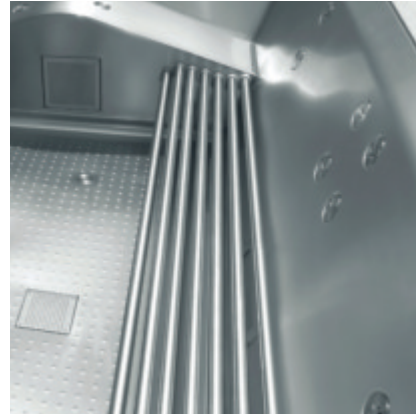

LOVING ATTENTION TO DETAIL

Subtle differences lie in the details. It is not enough for us just to use high quality materials. We like to realize individual preferences; from many types of access possibilities, benches or recliners as well as attractive design of operating units and water features to creative solutions for unique requests. We combine functionality and durability with aesthetics and uniqueness.

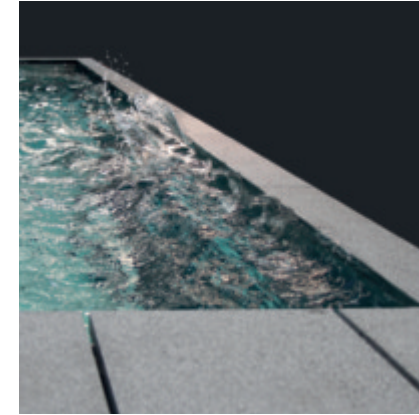

AIR JET MASSAGE RECLINER

POOL COVERS

To optimize the duration of the bathing season we offer the finest quality coverings from reputable manufacturers. Pool covers are available with various lamellae and several types of drive motors.

POOL ROOFING

Here too we are very proud to have a reliable cooperation partner who is able to create the perfect pool roofing according to your wishes. Finding individual solutions that receive our customers' appreciation is of utmost concern to us.

POOL TECHNOLOGY

We are a full-service supplier in the swimming pool sector and have been providing our customers with excellent quality products also in the water treatment and water features segments for almost 10 years.

VISIT US

We hope you could get a first impression of our comprehensive portfolio. We would like to get to know you and your ideas for the pool of your dreams. It would be our pleasure to welcome you to our showroom for a consultation so that your personal dream of an oasis of well-being can become true.
